From Frontend to S/4HANA with SAP Intelligent Suite

Tech notes:

SAP UI5, built on Open UI5 (HTML, CSS, JS)

OData exposes CDS views to UI5

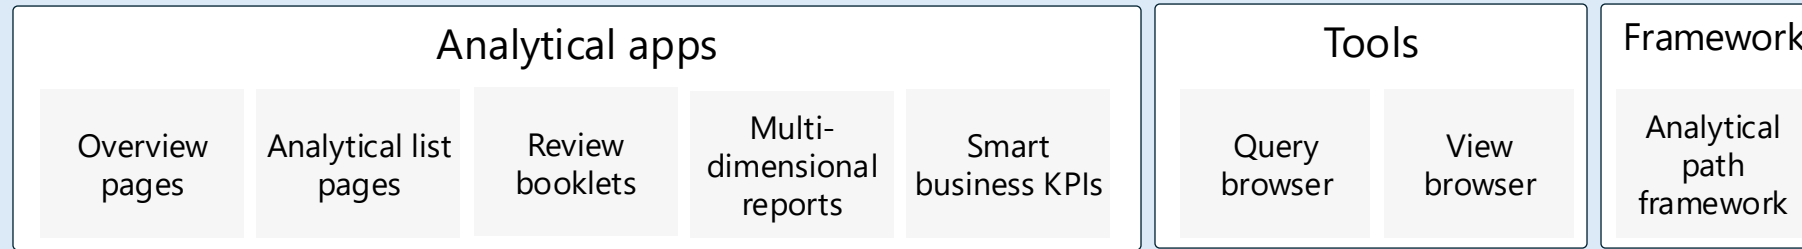

No data persists

Defined by mix of SQL & proprietary code

In-memory computing, column store

S/4HANA

UI5 Fiori applications for embedded analytics: structured by **roles & business scenarios**

Odata service

S/4HANA backend:

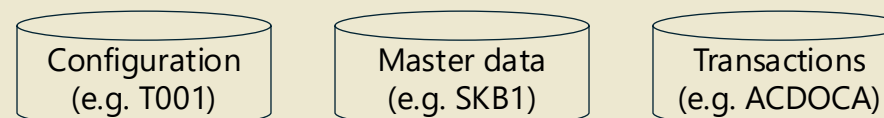

Virtual data model:
Analytical queries and cubes (core data services views)

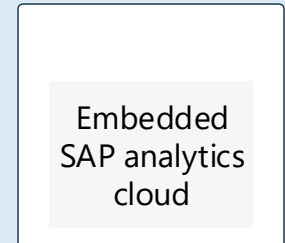

Restructure to role / scenario

Proprietary/SQL

HANA database tables: structured by application & db logic

SAP Analytics Cloud

Stories launch from other apps

SAC:

- An extension to S/4HANA, not but deeply integrated
